

VENUE
WIFI

**YOUR VENUE.
OUR EQUIPMENT.
MONEY IN YOUR POCKET.
WHAT COULD BE BETTER?**

Brown Pelican WiFi is proud to provide the permanent WiFi network for Pier 27 and Pier 35 in San Francisco, mixed-use event venues and cruise ship terminals.

We all know that clients demand secure, reliable WiFi for their events, and there's no better way to provide it than to have your venue set up for the high density, hostile environments that events demand. To give your clients the rocking WiFi they want, we can install a permanent solution for your venue that we own, manage and maintain. Or we'll be your preferred partner and install an enterprise grade network on an event-by-event basis. If you have an existing network, but clients have critical usage needs that you don't support, we're the partner for you.

And - we'll share the revenue with you.

Interested? Reach out and let's talk about how to take your venue to the next level.

Craneway Pavilion is one of our venues in which we're a preferred partner. When clients do an event at Craneway, we're there to help with a custom network installed for their specific needs.

Fort Mason Center is an example of a premier event venue where our permanent WiFi installation provides a dependable, secure network for events ranging from 10 to 5,000 attendees.

WHAT YOU GET

- Based on your venue's needs, we can become a preferred partner and install for each event Or - we'll install a permanent WiFi network, tailored to your venue and scalable to support a variety of events
- We use enterprise grade equipment that handles 10 - 10,000+ users
- We can provide fully-managed support during all event hours to ensure max network reliability
- We'll source and manage a bandwidth circuit that accommodates a range of usage
- Our experienced staff works directly with your clients so you don't have to answer technical questions

HOW IT WORKS

- Brown Pelican WiFi will do a site analysis to determine the best deployment for your venue
- We own, manage and maintain the WiFi equipment and bill your clients for our services
- We'll create a revenue share plan with you for your venue's events
- We work with our network of bandwidth partners to bring in the best solution for your needs
- There's limited or no network set up time for events, which can reduce costs for your clients

Brown Pelican WiFi was founded in 2009 by experts in the event industry with over 20 years of experience producing some of the biggest events around. We get the complexities and challenges that events demand, and we bring that experience to every WiFi project, whether live, virtual or hybrid. We have a reputation for making the impossible happen, and we've built systems that use the best of the best network equipment, designed specifically for the event environment.

Our networks can be experienced in iconic venues including, Pier 27, Pier 35, Fort Mason Center, The San Francisco Armory, Pier 70, Craneway Pavillion and Bill Graham Civic Auditorium, among others. Brown Pelican WiFi also provides temporary WiFi solutions, in cities across the US, Canada and Europe, for brands like Google, Intel, LinkedIn, Facebook, HP, Samsung, GE, T-Mobile, Nike, NFL, Lady Gaga, Ford and Salesforce, to name a few.

“OUR CLIENTS APPRECIATE THE SOLID WIFI IN OUR VENUE. IT'S DEFINITELY A SELLING POINT WHEN THEY'RE CHOOSING WHERE TO HOLD THEIR EVENT.”
-S.C., PIER 27, SAN FRANCISCO
